## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 31 and 32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 31 recites the limitation polarization controlled, but it is not clear from the claims what limitation effects this polarization control. The claim recites "wherein...the specific [100] orientation of both said active laser material and said monocrystalline layer achieves controlled polarization of the laser cavity." However, the claim does not recite an orientation for the monocrystalline layer.

Claims 17-30 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. An active lasing material and saturable absorber layer integrated device does not define a laser cavity, nor will it produce a laser beam in and of itself. The entirety of the apparatus forming the laser cavity should be included in claim 17 so that a laser cavity can be properly defined in all of these claims.

***Response to Arguments***

Regarding Claims 17-30, the Applicant makes the argument that the elements not claimed are part of what is considered well known in the art. Accordingly, these missing elements are not required to be claimed. The rejection stands as discussed above because it is not obvious to one of ordinary skill in the art, as determined by the Examiner, what the Applicant regards as the metes and bounds of his claimed invention.

The Applicant is advised to provide drawings corresponding to the claimed inventions to help rectify any further indefiniteness issues.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
